

## Como

World class athletes do not compromise when choosing their product, so why should you?

The Javelin Como is for the serious velodrome rider who thinks second place may as well be last. It is a hard-crafted, wind tunnel tested frame with tubing designed by aerodynamics guru John Cobb.

This is not a toy for the weekend warrior. It is a frame designed and crafted to win world championships.

Why compromise when you can have the ultimate track frame? This is a bike made to win races, not just compete in them.

The ultimate custom carbon fiber track bike.

- o Wind tunnel tested and designed carbon fiber tubing
- o Tubing designed by John Cobb
- o Hand-crafted carbon fiber frame
- o Stiff, aerodynamic rear stays for maximum power at the Velodrome
- o Made in Italy
- o Aerodynamic seat tube and seat post with wheel cutout for added aerodynamic efficiency
- o Only available with full custom sizing and geometry as part of the

Riserva

program
