

JAVELIN TAURASI

A bike is not just a bike anymore. It is carbon fiber racing technology. It is hand made in Italy. Its weight isn't in pounds, but grams. Its pedigree includes champions and perfectionists, racers and engineers.

The Taurasi is all these things - and more. It's a state of the art hand-wrapped carbon fiber frame produced in small numbers by Italian artisans who could care less about marketing campaigns and advertising dollars. It's a frame built by those who hate compromise and loathe complacency. They only care about results, about staying stiff under 2000 watts of power, about holding steady on 40+ mph descents and being able to surge to the front of the pack when the crucial time comes.

Get ready for a bike that demands more of you when you demand more of it.

Taurasi

TAURASI

A handmade, quick and comfortable carbon fiber racing machine.

- o Hand-crafted carbon fiber frame
- o Lightweight, sub-1100 gram frame
- o Made in Italy
